

# Defense Contractor Achieves Perfect 110 JSVA Score with PreVeil's Compliance Solution

Yet another PreVeil customer received a perfect 110/110 score on their CMMC Joint Surveillance Assessment (JSVA), validating PreVeil's comprehensive + proven solution, used by over 1,100 defense contractors.

## CHALLENGE

A 300-employee defense contractor, with a 25% federal division, needed to achieve NIST 800-171 and CMMC compliance quickly and affordably. Their challenges included:

- **Limited Time:** They understood CMMC is coming and will start appearing in contracts in late 2024 or early 2025.
- **Resource Constraints:** With a small IT team, managing a complex implementation like GCC High was risky and expensive.
- **Compliance Expertise:** The company lacked deep in-house expertise to navigate the intricacies of NIST 800-171 and CMMC compliance.

## SOLUTION

Leveraging PreVeil's comprehensive solution, the company deployed an enclave to secure CUI for their federal division while supporting 102/110 of the NIST 800-171 controls.

- **PreVeil Email + Drive Platform:** This secure platform ensured the protection of CUI.
- **Compliance Accelerator Documentation:** A complete set of self-service documents (System Security Plan, Plan of Actions and Milestones, Endpoint Management checklist, Awareness and Training videos, etc.) and access to PreVeil University's learning resources (including SOPs, video tutorials, and C3PAO commentary).
- **1x1 Compliance Support:** PreVeil provides dedicated customer and compliance support for guidance throughout the JSVA process.

The Accelerator Package documentation was fabulous and easy to use- we did not get a single comment on our SSP from the C3PAO or DIBCAC. And it was a BARGAIN- The documentation alone saved me \$100,000

## RESULTS

They achieved a perfect 110/110 score in their JSVA assessment, which will translate directly to a CMMC Level 2 certification once rulemaking is complete. They also achieved:

- **Fast Implementation:** PreVeil's solution was implemented within weeks, significantly reducing the time to compliance compared to complex GCC High deployments.
- **Reduced Costs by 90%:** They avoided the high costs associated with consulting firms and a full rip + replace GCC High implementation.
- **Greater Security:** PreVeil's user-friendly platform streamlined CUI management and minimized spillage risks.

When it comes to speed to compliance and cost, PreVeil is undoubtedly the right decision. We got it done on time and on budget, saving \$200,000 compared to GCC High.

We know CMMC will go into effect in Q1 2025 and GCC High is a huge system implementation PLUS you have to meet 110 controls PLUS do all the documentation- so if you care about being on time, GCC High is a much bigger risk than PreVeil.
