

PreVeil Compliance Accelerator

Achieving CMMC compliance requires more than just safeguarding Controlled Unclassified Information (CUI). Defense Contractors must also create extensive documentation, which the **DoD estimates can cost up to \$150,000**. This leaves contractors to choose between tackling this time-consuming burden themselves or hiring costly external consultants.

PreVeil's Compliance Accelerator offers a better solution — a proven toolkit that, along with PreVeil Email and Drive, cuts CMMC documentation work by 80%, expediting compliance and saving tens of thousands of dollars. Here's what it includes:

Assessor-Validated, Assessment-Ready Documentation

PreVeil offers an **industry-first, comprehensive set of assessment-ready documentation** that covers everything you need for a perfect 110/110 in just 4-6 months. Every document has been reviewed by compliance experts and CMMC assessors (C3PAOs) for accuracy and completeness.

- Fully-developed **System Security Plan (SSP)** addressing all 320 objectives
- 14 comprehensive **Standard Operating Procedures (SOPs)** covering all control families
- **Shared Responsibility Matrix (SRM)** which reflects a standard environment
- Supporting procedural **documents, templates, and implementation guidelines**
- Network and CUI flow **diagram templates**
- Comprehensive **assessment checklists** for ongoing compliance management

Road to CMMC Videos

This custom roadmap to CMMC, guided by C3PAOs, takes customers from the theoretical to the practical.

Access to PreVeil's Compliance Team

1x1 access to PreVeil's in-house licensed RPs (Registered Practitioners), CCPs (Certified CMMC Professionals), and CCAs (Certified CMMC Assessors) to answer compliance questions both before and during an assessment.

A Proven Solution

Defense contractors + C3PAOs have used PreVeil to achieve CMMC compliance with perfect 110 scores. Here's what one of them said:

“The Accelerator Package documentation was fabulous and easy to use—we did not get a single comment on our SSP from the C3PAO or DIBCAC. And it was a BARGAIN—the documentation alone saved me \$100,000.”
